ST790 Final Project Guidelines

Eric Chi

February 12, 2017

Important Dates:

- Proposals: Due at 5:00 pm on 3/3
- Proposals: Must be approved by 3/15
- Milestone Report: Due at 11:59 pm on 4/7
- Poster Presentations: 1:30 pm - 2:45 pm on 4/26
- Final Report (5 page limit): Due at 11:59 pm on 5/1 (no late submission!)

Project Proposal:

Project proposals should be emailed to yfeng8@ncsu.edu. Proposals are due at 5:00 pm on 3/3. Your proposal should be a normal (plain ASCII) email. Include the following

- Title of the project
- Full names of all team members
- 300-500 word description of what you plan to do do

Be sure to include a sentence or two on

- Prior work and what your contribution is. No need to be grandiose. A "small" contribution that is done well is a project well done.
- Why the problem interesting from a computational perspective?

Finally, include

- An itemized list of weekly goals between 3/15 and 5/1

Don't stress over this last step. It's meant as a tool to help you and me assess how reasonable your project is. Plans of course will change as the project unfolds. But we want to set some realistic expectations from the start.
